

Welcome Amigos School along with the Director Elizabeth and all of the teachers and assistants are just wonderful. Classes are very small and all of the kids receive a lot of personal attention that they need at this young age. Everyone at Welcome Amigos treats the kids as though they are their own and kids obviously sense it and love coming here. Our son Andrew was attending Welcome Amigos part time for 2 years, starting when he was 3 years old. Having the parents that do not speak any Spanish, during a 2 year period Andrew has learned to completely understand everything that is being said to him in Spanish as well as comfortably interact with the teachers in Spanish. Not only did Andrew excel in learning Spanish, he has also tremendously improved his social and interaction skills because of the amazing work of his teachers. Welcome Amigos School goes far beyond just trying to teach kids Spanish. The school looks at all of the aspects of your child's development and tries to improve on all of them. Moreover, Welcome Amigos curriculum is amazing and second to none. Not only does the school prepare the kids very well for the Kindergarten, many of the lessons incorporate Science, Botany, Zoology, Biology, Geography, Music, Dancing, Cooking, etc. and teachers do it in such a fun way that it instills the true love of learning for many years to come. We feel extremely fortunate to have found such a wonderful school for our son Andrew and looking forward to placing our younger daughter Erica at Welcome Amigos in a few years.
